

WELCOME!

Monthly EnviroDIY-DRWI User Group Meeting

Online, Thursday August 19, 2021, 2:30-3:30p

 **Monitor My Watershed®**

STROUD
WATER RESEARCH CENTER

These Monthly Meetings

- Every third Thursday of the month
- 2:30-3:30p
- Zoom link will remain the same:
<https://us02web.zoom.us/j/81881801310?pwd=eUFmbXZLbmRibVcxa1dtNVhzRmNvZz09>
- Reminder email will be sent one week prior to each month's meeting
 - Station owners/managers organize volunteers/others to attend and share Zoom link

REMINDER

- Attendees include:
 - Groups working in Delaware River Watershed Initiative (DRWI)
 - Groups working in Delaware River Basin (DRB) but not DRWI
- Stroud Center support via DRWI and C-SAW

Delaware River Watershed Initiative (DRWI)

<https://4states1source.org/>

C-SAW

<https://www.c-saw.info/>

What is C-SAW?

The Consortium for Scientific Assistance to Watersheds (C-SAW) is a team of specialists who provide *free* organizational and scientific technical assistance to Pennsylvania-based watershed and conservation organizations.

C-SAW does not conduct watershed monitoring or assessments. Instead, C-SAW helps watershed organizations do a better job with their own monitoring and assessments.

Goals for these monthly meetings

- **Time/space to check-in, ask questions, report issues, network, etc.**
- **Updates** from Stroud Center
- **Presentations**
 - **Station Owner/Manager Presentations** – communicate about individual situations, local watershed work
 - **Focus Topic Presentations** – guest presenters talk about technical/ecological/other focus topics

****All of this to support gathering good data and using it purposefully***

Facilitators

Stroud Center Facilitators:

David Bressler, Rachel Johnson, Christa Reeves, Shannon Hicks

Master Watershed Steward Facilitators:

Carol Armstrong, George Seeds (Chester & Delaware Co.)

Zoom Orientation

***Meeting is being recorded**

***Mute unless asking question**

Stroud Center Perspective – EnviroDIY in DRWI

- Primary Goal
 - Support Station owners, managers, and volunteers
 - Use stations for local purposes
- Secondary Goal
 - Analyze basin-wide data set
 - Develop tools to characterize and contextualize watersheds

Today's Agenda

1. Introduction
2. Stroud Updates
3. Presentation: Jake Lemon and Matt Barney,
Trout Unlimited
4. Discussion
5. Conclusion

Stroud Center Updates

- Stroud Center 98% finished collecting chemistry grab samples at all active EnviroDIY monitoring stations in Delaware River Basin

Suspended Sediments (mg/L)
DOC ($\mu\text{g C/L}$)
Cl (mg/L) from SEAL
NH ₄ N (mg/L) from SEAL
NO ₃ N (mg/L) from SEAL
PO ₄ P (mg/L) from SEAL
TN (mg/L) from SEAL
TP (mg/L) from SEAL
Al from DE-ICP (mg/L)
B from DE-ICP (mg/L)
Ca from DE-ICP (mg/L)
Cu from DE-ICP (mg/L)
Fe from DE-ICP (mg/L)
K from DE-ICP (mg/L)
Mg from DE-ICP (mg/L)
Mn from DE-ICP (mg/L)
Na from DE-ICP (mg/L)
P from DE-ICP (mg/L)
S from DE-ICP (mg/L)
Si from DE-ICP (mg/L)
Zn from DE-ICP (mg/L)

Stroud Center Updates

- New, pilot – Service Request Form

EnviroDIY Monitoring Station Service Request Form

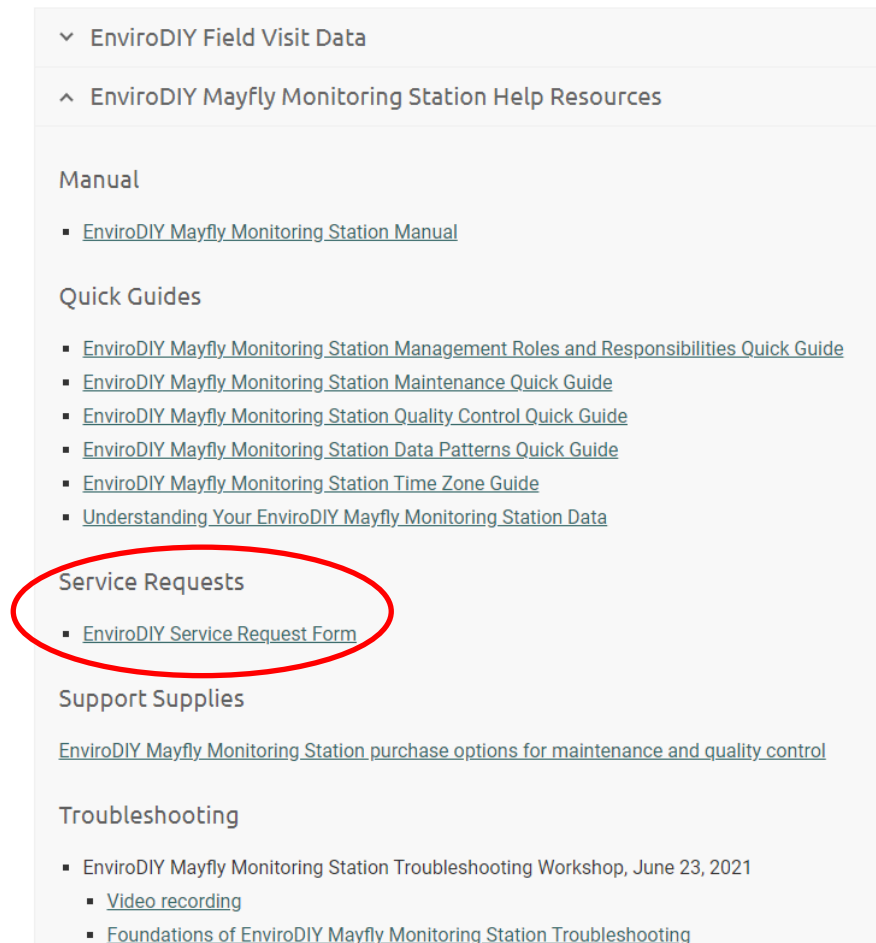

Please complete this form with as much information as possible to assist Stroud Water Research Center technicians in troubleshooting your problem. For extremely urgent issues please contact the Stroud Center team directly (rjohnson@stroudcenter.org; shicks@stroudcenter.org; dbressler@stroudcenter.org).

*Please note, station assistance is only available to groups working within the Delaware River Basin.

Stroud Center Updates

Station Owner/Manager – ensuring station is managed properly

- Assign individuals to the following roles: 1) desktop monitoring of station functionality via Monitor My Watershed, 2) sensor cleaning and station maintenance, and 3) quality control (QC)
- Track above tasks and make sure that they are being accomplished
- Ensure Hologram cell plan is paid to ensure data transmission to Monitor My Watershed

Desktop monitoring of station functionality via Monitor My Watershed (Daily)

- Check site(s) of interest on a daily basis via Monitor My Watershed:
 - On “Browse Sites” map: Is the station live (i.e., dark green)?
 - Are the quick view data panels showing expected data ranges?
 - Are there any abnormal numbers/patterns in quick view data panels or in Time Series Analyst graphs?
- Contact station owner/manager, maintenance, and/or QC people with any issues identified (e.g., sensor fouling, low battery)

Sensor cleaning and station maintenance (Weekly)

- Review station data on Monitor My Watershed before and after station maintenance
- Visit station at least once a month (weekly is recommended)
- Clean sensor(s)
- Clear sediment and debris from under and near sensor(s)
- Clear vegetation and debris from around the logger and solar panel
- Complete Field Visit Data sheet and enter into online form
- Reference EnviroDIY Maintenance Quick Guide as needed

Conduct Quality Control (Quarterly and per situational needs)

- Review station data on Monitor My Watershed before and after conducting QC
- Use calibrated hand-held meter to cross check station conductivity and temperature data
 - Make sure QC measurement and sensor station reading match up – if they don’t (difference greater than 10%), proceed with troubleshooting or contact Stroud Center
- If turbidity is a high priority, conduct cross check using a turbidity tube or turbidity meter when conditions are suitable (i.e., when water is cloudy/muddy enough to assess turbidity data)
- Use metric ruler and on-site QC rebar pin (or staff gauge) to cross check station depth data
- Swap microSD card with blank SD card and save data file to secure location
- Complete Field Visit Data sheet and enter into online form
- Reference EnviroDIY Quality Control Quick Guide as needed

Stroud Center Updates

Current lack of reliability of cell boards

- **NEW cell boards, available <1 month**
- **Updated Mayfly Data Logger and other accessories available <1 month**
- **Shannon more info?**

Stroud Center Updates

- Campbell's new Clarivue Turbidity sensor is now available

ClariVUE10

ISO 7027 Compliant, Side-Scatter Turbidity Sensor

[Ordering Info](#)

[Ask a Question](#)

Turbidity Sensors / ClariVUE10

Side-Scatter
Measurements with ISO
7027 Compliance

Stroud Center Updates

- Situational importance of removing sensor bundles (minimum one time per year)
 - Inspect sensors and thoroughly clean
 - The pvc can get sealed to the in-stream rebar – remove from time to time to prevent this
 - If your bundle hasn't been removed in a while be careful when removing it – you might pull the entire rebar out
 - If it is sealed and can't be removed....???

Stroud Center Updates

Stroud Center Updates

- Monthly meetings
 - July survey feedback indicated folks were overall happy with format; suggestions:
 - “Most of the publicly-accessible free presentations that I run across are not technical or in-depth enough, so I’m glad there is a venue at Stroud for deeper dives into topics.”
 - “...you might consider having multiple 5 (10 max) minute presentations by attendees...they could talk about their pet project without having to do a formal PPT for the discussion.”
 - “I wonder if there is any way to facilitate more conversation after the presentations among the participants/presenter: a time where folks might reflect, consider how the presentation affects their own work, etc. Just a little bit deeper conversation than we get into during a quick Q&A after presentations. Although prompting conversation like this is especially difficult on Zoom, so I understand the challenge of this suggestion.”
 - **Several meetings throughout the year for more extensive EnviroDIY review, e.g., Sept or Oct Shannon will review all the new tech upgrades**

Future meeting presenters

- September 16 – Updates on standard Stroud Center EnviroDIY monitoring stations: Mayfly upgrades, new cell boards, new sensors, new code – Shannon Hicks
- Oct – Anyone want to talk about their work per survey feedback?
 - Carol Armstrong, Pickering Creek monitoring and/or
 - Jim Moore, low cost conductivity sensors

Any questions before we move on?

Monthly Presentation

EnviroDIY at Trout Unlimited

**Jake Lemon (Jacob.Lemon@tu.org) and Matt Barney
