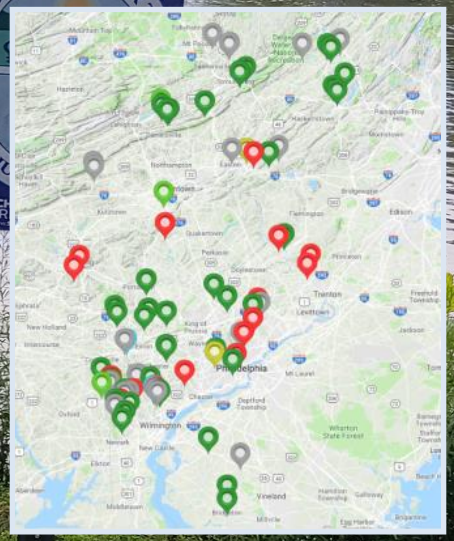
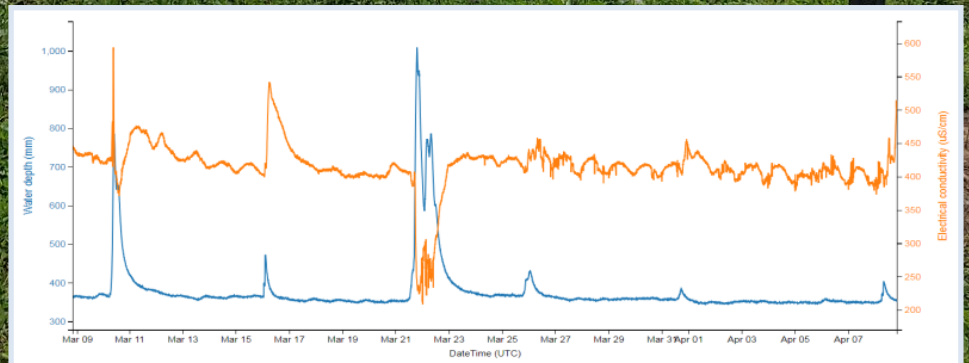
WELCOME!

Monthly EnviroDIY-DRWI User Group Meeting

Online, Thursday November 18, 2021, 2:30-3:30p





EnviroDIY

Monitor My Watershed®

Stroud Water Research Center

Zoom Orientation

*Meeting is being recorded

***Mute unless asking question**

STROUD WATER RESEARCH CENTER

These Monthly Meetings

- Every third Thursday of the month
- 2:30-3:30p
- Zoom link will remain the same: https://us02web.zoom.us/j/81881801310?pwd=eUFmbXZLbmRibVcxa1dtNVhzRmNvZz09
- Reminder email will be sent one week prior to each month's meeting
  - Station owners/managers organize volunteers/others to attend and share Zoom link

STROUD WATER RESEARCH CENTER

REMINDER

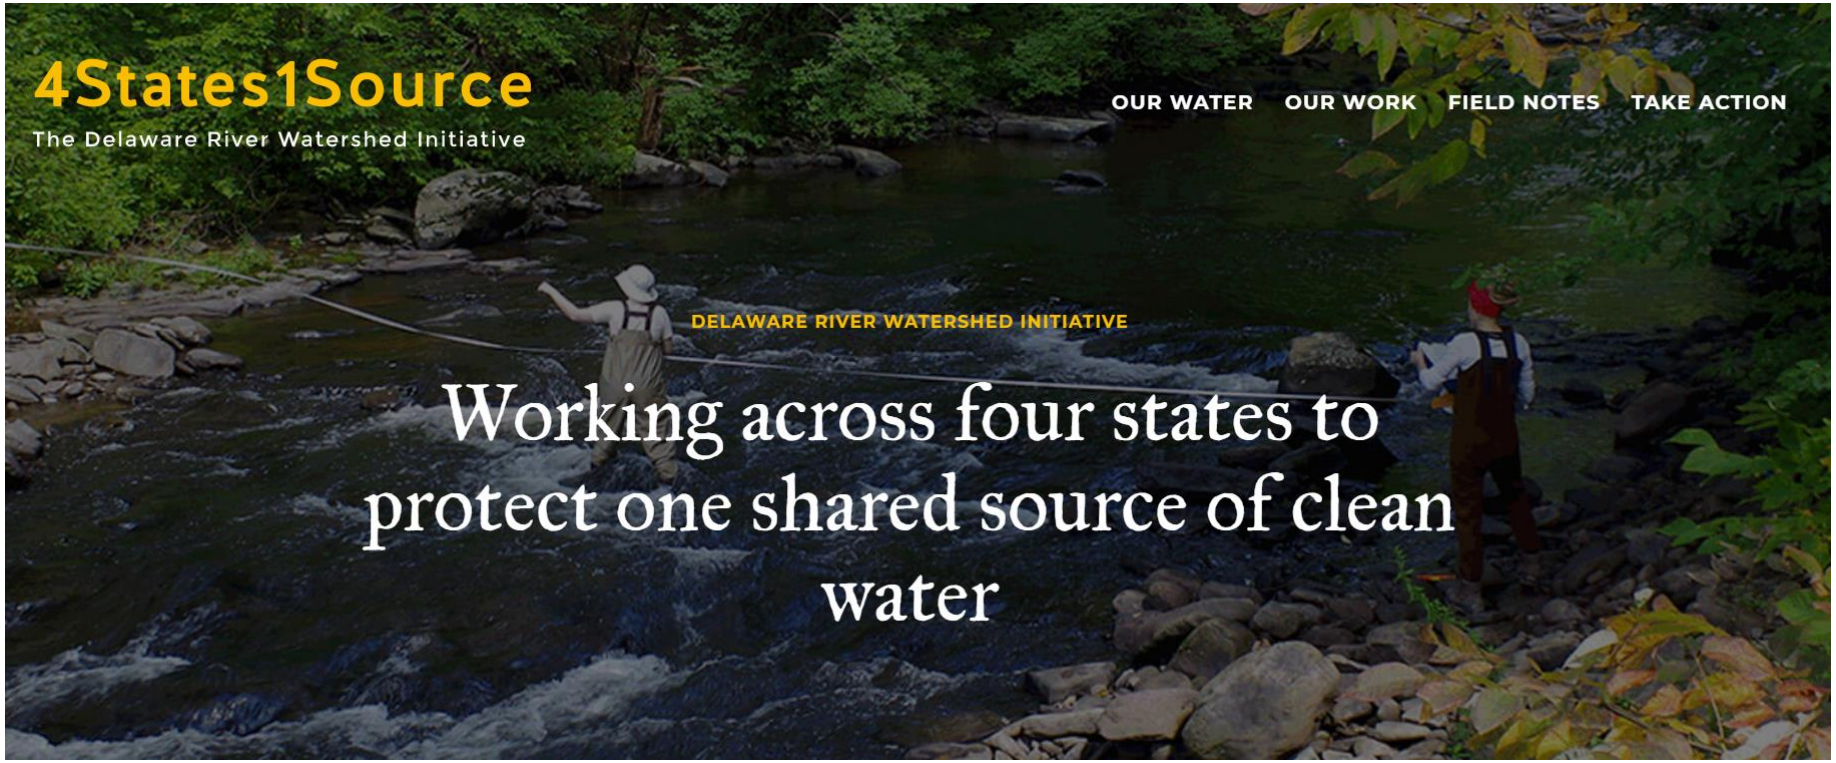
- Attendees include:
  - Groups working in Delaware River Watershed Initiative (DRWI)
  - Groups working in Delaware River Basin (DRB) but not DRWI
  - Miscellaneous folks from outside the DRB

- Stroud Center support via DRWI and C-SAW

STROUD WATER RESEARCH CENTER

Delaware River Watershed Initiative (DRWI)

https://4states1source.org/



STROUD WATER RESEARCH CENTER

C-SAW

https://www.c-saw.info/

What is C-SAW?

The Consortium for Scientific Assistance to Watersheds (C-SAW) is a team of specialists who provide *free* organizational and scientific technical assistance to Pennsylvania-based watershed and conservation organizations.

> *C-SAW does not conduct watershed monitoring or assessments. Instead, C-SAW helps watershed organizations do a better job with their own monitoring and assessments.*

STROUD WATER RESEARCH CENTER

Goals for these monthly meetings

- **Time/space to check-in, ask questions, report issues, network, etc.**

- **Updates** from Stroud Center

- **Presentations**
  - **Station Owner/Manager Presentations** – communicate about individual situations, local watershed work

  - **Focus Topic Presentations** – guest presenters talk about technical/ecological/other focus topics

All of this to support gathering good data and using it purposefully

STROUD WATER RESEARCH CENTER

Facilitators

Stroud Center Facilitators:

David Bressler, Rachel Johnson, Christa Reeves, Shannon Hicks

Master Watershed Steward Facilitators:

Carol Armstrong, George Seeds (Chester & Delaware Co.)

Master Watershed Steward Program

PennState Extension

STROUD WATER RESEARCH CENTER

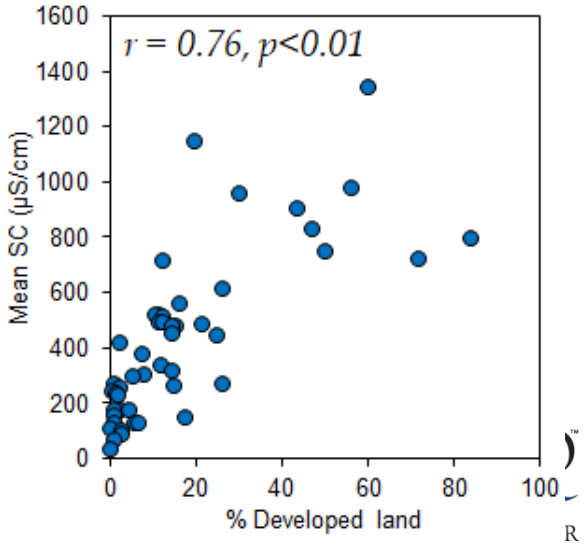
Stroud Center Perspective – EnviroDIY in DRWI

- Primary Goal
  - Support Station owners, managers, and volunteers
  - Use stations for local purposes
- Secondary Goal
  - Analyze basin-wide data set
  - Develop tools to characterize and contextualize watersheds



Today's Agenda

1. Introduction
2. Stroud Updates
3. Presentation: No presentation
4. Discussion – open discussion, NOT recorded
5. Conclusion

STROUD™
WATER RESEARCH CENTER

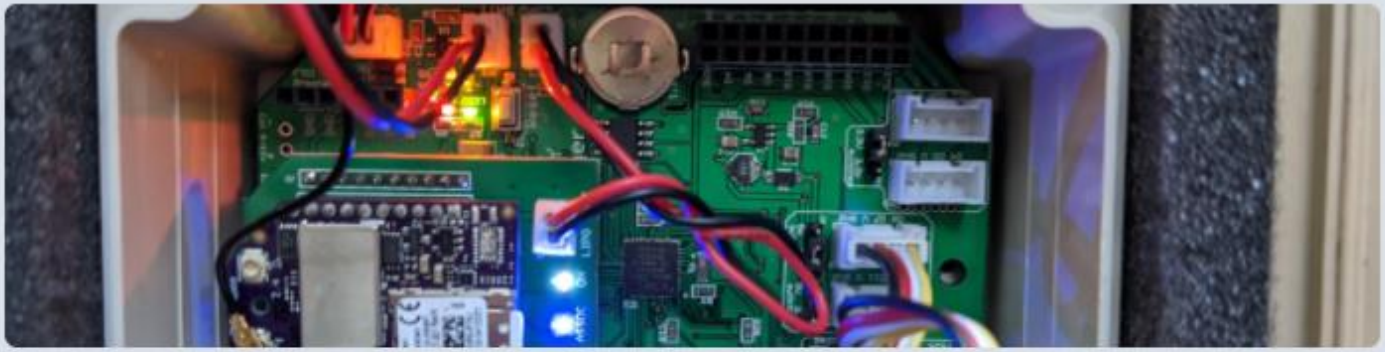
Stroud Center Updates

- Stroud Center recommendation to **Remove and clean sensor bundle at least once a year**

- The PVC can get sealed to the in-stream rebar – remove from time to time to prevent this
- Inspect sensors and thoroughly clean
- If your bundle hasn't been removed in a while be careful when removing it – you might pull the entire rebar out

Stroud Center Updates

- New, pilot – Service Request Form, available at https://wikiwatershed.org/drwi/



EnviroDIY Monitoring Station Service Request Form

Please complete this form with as much information as possible to assist Stroud Water Research Center technicians in troubleshooting your problem. For extremely urgent issues please contact the Stroud Center team directly (rjohnson@stroudcenter.org; shicks@stroudcenter.org; dbressler@stroudcenter.org).

*Please note, station assistance is only available to groups working within the Delaware River Basin.

Stroud Center Updates

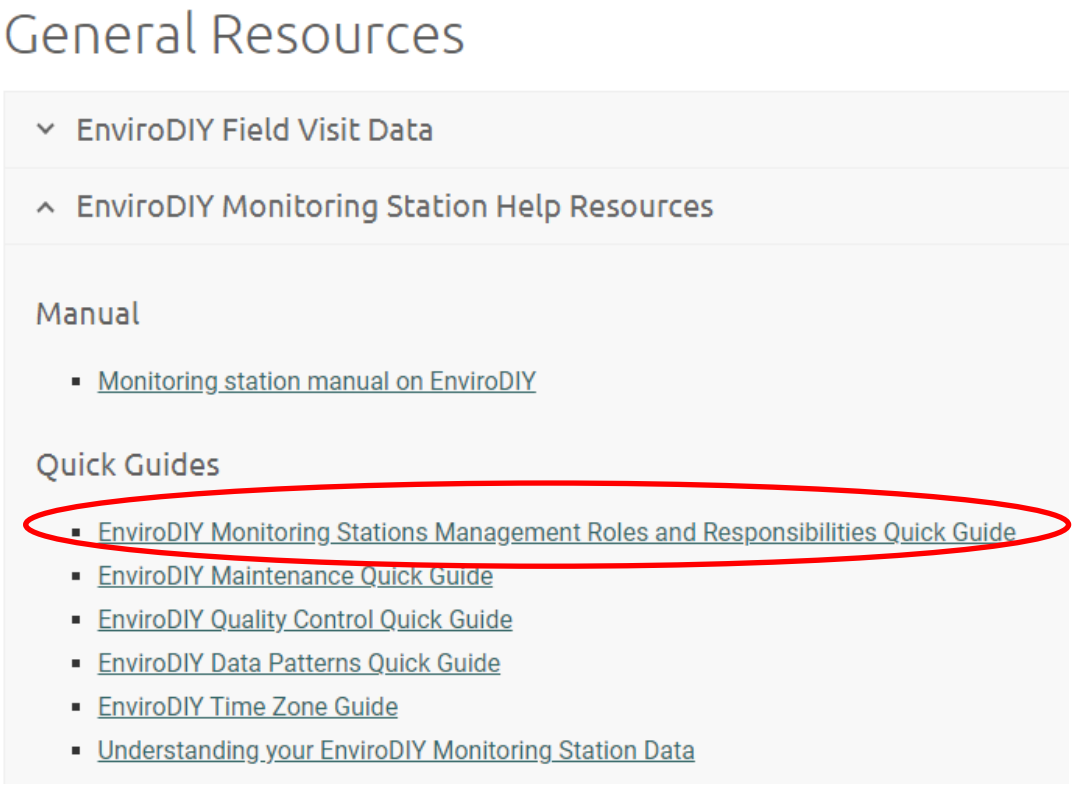
Quick Guide: Recommended Roles/Responsibilities for Managing an EnviroDIY Monitoring Station

Located at: https://wikiwatershed.org/drwi/



STROUD WATER RESEARCH CENTER

Stroud Center Updates

Quick Guide: Recommended Roles/Responsibilities for Managing an EnviroDIY Monitoring Station

Station Owner/Manager – ensuring station is managed properly

- Assign individuals to the following roles: 1) desktop monitoring of station functionality via Monitor My Watershed, 2) sensor cleaning and station maintenance, and 3) quality control (QC)
- Track above tasks and make sure that they are being accomplished
- Ensure Hologram cell plan is paid to ensure data transmission to Monitor My Watershed

Desktop monitoring of station functionality via Monitor My Watershed (Daily)

- Check site(s) of interest on a daily basis via Monitor My Watershed:
  - On "Browse Sites" map: Is the station live (i.e., dark green)?
  - Are the quick view data panels showing expected data ranges?
  - Are there any abnormal numbers/patterns in quick view data panels or in Time Series Analyst graphs?
- Contact station owner/manager, maintenance, and/or QC people with any issues identified (e.g., sensor fouling, low battery)

Sensor cleaning and station maintenance (Weekly)

- Review station data on Monitor My Watershed before and after station maintenance
- Visit station at least once a month (weekly is recommended)
- Clean sensor(s)
- Clear sediment and debris from under and near sensor(s)
- Clear vegetation and debris from around the logger and solar panel
- Complete Field Visit Data sheet and enter into online form
- Reference EnviroDIY Maintenance Quick Guide as needed

Conduct Quality Control (Quarterly and per situational needs)

- Review station data on Monitor My Watershed before and after conducting QC
- Use calibrated hand-held meter to cross check station conductivity and temperature data
  - Make sure QC measurement and sensor station reading match up – if they don't (difference greater than 10%), proceed with troubleshooting or contact Stroud Center
- If turbidity is a high priority, conduct cross check using a turbidity tube or turbidity meter when conditions are suitable (i.e., when water is cloudy/muddy enough to assess turbidity data)
- Use metric ruler and on-site QC rebar pin (or staff gauge) to cross check station depth data
- Swap microSD card with blank SD card and save data file to secure location
- Complete Field Visit Data sheet and enter into online form
- Reference EnviroDIY Quality Control Quick Guide as needed

STROUD WATER RESEARCH CENTER

Stroud Center Updates

Current lack of reliability of cell boards

- NEW cell boards – actively being replaced in DRB
  - Updated Mayfly Data Logger is usually replaced too

- ***If a station goes offline but battery was well above 3.5v then it's likely a cell board issue**

STROUD WATER RESEARCH CENTER

Stroud Center Updates

Updates to EnviroDIY/Mayfly

https://www.envirodiy.org/shop/

EnviroDIY Mayfly Data Logger (Pack of 5)
$0.00

EnviroDIY Mayfly Data Logger Board and Starter Kit (Pack of 5)
$0.00

EnviroDIY LTE Bee (Pack of 5)
$0.00

EnviroDIY OLED Half-shield (Pack of 5)
$0.00

EnviroDIY RS-485 Half-shield (Pack of 5)
$0.00

EnviroDIY Multipurpose 6-pin Screw Terminal Grove Adapter (Pack of 5)
$0.00
